Subject: Questions/ideas

Hi, Mark.

Libby took off before I had a chance to chat with her about next week, so these are my not-fully-formed questions/ideas. If I think of anything else over the weekend, I'll shoot it to you.

Resource Commitment:

I don't know what specific language is in the SAA, but I think it might be a good idea to get a sense of the resources they would dedicate to supporting our CI efforts. In the short-term, for example, we will probably need a lot of information about sampling plans, results and analysis. How do they plan to provide that information, plus more, as the cleanup continues? Will they dedicate an employee, would it be part of the project manager's duties, will they hire a consultant? They may not know, but it could be useful to see how they are thinking about resource issues.

Community Advisory Group:

What are CFAC's long-term plans for the Community Liaison Panel? What are they trying to achieve with the CLP? Under what conditions could it be brought into a CAG? We are interested in not duplicating efforts and creating a burden on the community. We would welcome an opportunity to discuss our approach to community involvement with them.

Reuse/Redevelopment:

We will be beginning to conduct community interviews as part of developing the community involvement plan. Since we have heard that there is an interest in the community for a process to identify community needs/concerns related to site reuse/redevelopment, we likely will be asking community members about their interest in a dialogue about reuse options and redevelopment opportunities for the site. Once the nature and extent of contamination is better defined, would they have an interest in participating in such a dialogue?

NPL Listing:

We understand their interest in removing the site from the NPL. We think the best way to achieve that is through an SAA rather than a public relations campaign.

Have a great weekend!
